Subject: Settlement is too weak.

I feel that the core issues at work in the antitrust trial have not been adequately addressed in the settlement. Microsoft continues to leverage it's desktop monopoly into new markets (instant messengers, media players), and the settlement does not address these issues at all.

As a consumer and IT professional, I feel that Microsoft's current and continued business practices have had and will continue to have a negative impact on my computing experience and the industry as a whole.

Respectfully,

Christopher Whipple
